Summary

Master's student in Data Science and AI at DSTI Paris, with a Bachelor's degree in Computer Science and hands-on experience in data analysis, machine learning, and AI-driven projects. Proficient in Python, SQL, Pandas, NumPy, and Scikit-learn, with experience in data preprocessing, feature engineering, model evaluation, and classification. Interested in applying analytical and problem-solving skills to transform data into actionable insights and develop data-driven solutions that support business decisions and improve performance.

Technical Skills

Data Analysis: Python, SQL, Pandas, NumPy, Excel, Data Cleaning, Data Visualization
Machine Learning: Scikit-learn, Random Forest, Gradient Boosting, XGBoost, Classification, Feature Engineering, Model Evaluation
Data Processing: Data Preprocessing, One-Hot Encoding, Feature Selection, PCA, FAMD, TF-IDF
Generative AI: AI Agents, Agentic AI, Large Language Models (LLMs), Prompt Engineering, AI Guardrails, Tool Calling, Promptfoo
Performance: KPI Monitoring, Performance Analysis, Process Optimization, Continuous Improvement, Data-Driven Decision Making
Tools: Git, Jupyter Notebook, Streamlit, Django

Education

MSc in Data Science and AI (Bac+5) Oct 2025 – Nov 2027
Data ScienceTech Institute (DSTI), Paris, France

B.E. in Computer Science (Bac+4) Nov 2021 – May 2025
Sir M. Visvesvaraya Institute of Technology, Bangalore, India

Professional Experience

Artificial Intelligence & Machine Learning Intern Sep 2024 – Jan 2025
Rooman Technologies, Bangalore, India

- Processed and analyzed datasets using Python and SQL for data preprocessing, analysis, and machine learning workflows.
- Applied feature engineering and iterative testing to identify patterns and improve model performance.
- Worked with structured and semi-structured data to support data-driven analysis and performance evaluation.

Front-End Web Development Intern Oct 2023 – Dec 2023
Varcons Technologies, Bangalore, India

- Developed an interactive web application using HTML, CSS, and JavaScript with responsive layouts and optimized page performance.
- Developed responsive web interfaces using HTML, CSS, and JavaScript, improving usability across desktop and mobile devices. Implemented interactive UI components and debugged front-end issues to improve website functionality and user experience.

Projects

Cyber Attack Detection – Machine Learning Nov 2025 – Mar 2026

- Built an end-to-end ML pipeline to classify DDoS, malware, and intrusion attacks using a 40,000-record network traffic dataset.
- Compared Random Forest, Gradient Boosting, and XGBoost using cross-validation and GridSearchCV to evaluate and improve model performance.
- Applied preprocessing, feature engineering, encoding, TF-IDF, PCA/FAMD, and feature selection to improve data quality and model robustness.

Fake Account Predictor – Machine Learning & NLP Jan 2025 – Mar 2025

- Developed an ML/NLP system using SVM and Neural Networks to detect fake social media accounts.
- Processed text using tokenization and TF-IDF and evaluated models using Precision, Recall, F1-score, and ROC-AUC.

Research Publication

Fake Account Detection in Social Media Using Machine Learning and Django Framework
International Journal of Innovative Research in Technology (IJIRT) May 2025
Volume 11, Issue 12. | View publication

Certifications & Professional Development

- OpenAI Design and Build Agentic Systems Oct 2026
- Claude Academy Building with the Claude API Oct 2026
- Forage BCG Data Science Sep 2026
- Google Generative AI Certificate Aug 2025
