Professional Summary

Final-year MSc student in Data Science and AI at DSTI, seeking an end-of-studies internship starting in January 2027 in Data Science, Machine Learning, or Artificial Intelligence. Strong foundation in Python, SQL, machine learning, NLP, feature engineering, and model evaluation, demonstrated through hands-on projects in cyberattack detection and fake account classification, as well as a published research paper. Eager to apply analytical and technical skills to real-world challenges and contribute to impactful, data-driven solutions.

Education

MSc in Data Science and AI (Bac+5) Oct 2025 – Nov 2027
Data ScienceTech Institute (DSTI), Paris, France
Bachelor's Degree in Computer Science (Bac+4) Nov 2023 – May 2025
Sri M Visvesvaraya Institute of Technology, Bangalore, India

Experience

Artificial Intelligence & Machine Learning Intern Sep 2024 – Jan 2025
Rooman Technologies, Bangalore, India
- Engineered data preprocessing workflows using Python and SQL to clean, transform, and prepare datasets for machine learning tasks.
- Supported model development and evaluation through experimentation, performance analysis, and iterative refinement.

Front-End Web Development Intern Oct 2023 – Dec 2023
Varcons Technologies, Bangalore, India
- Developed responsive web interfaces using HTML, CSS, and JavaScript to improve usability and user experience.
- Debugged interface issues and refined page structure and styling to improve functionality and responsiveness.

Projects

Cyber Attack Detection – Machine Learning Nov 2025 – Mar 2026
- Built an end-to-end pipeline to classify DDoS, malware, and intrusion attacks using approximately 40,000 network traffic records, applying preprocessing and feature engineering.
- Evaluated Random Forest, Gradient Boosting, and XGBoost using cross-validation and hyperparameter tuning.

Fake Account Detection – Machine Learning & NLP Jan 2025 – May 2025
- Developed a fake social media account detection system using SVM, Neural Networks, behavioural features, and NLP.
- Integrated Django REST Framework APIs for real-time classification and evaluated models using precision, recall, and F1-score.

Technical Skills & Tools

Programming Languages: Python, SQL, Java, JavaScript.
Machine Learning & NLP: Scikit-learn, XGBoost, Gradient Boosting, Random Forest, SVM, Neural Networks, TF-IDF, Feature Engineering.
Generative AI & Agents: LLMs, AI Agents, Agentic AI, Prompt Engineering, AI Guardrails, Tool Calling.
Data Analysis & Libraries: Pandas, NumPy, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Data Visualization, Statistical Analysis.
Frameworks & Developer Tools: Django, Django REST Framework, Streamlit, Git, GitHub, Jupyter Notebook, RStudio, VS Code.

Research Publication

Fake Account Detection in Social Media Using Machine Learning and Django Framework May 2025
International Journal of Innovative Research in Technology (IJIRT) Volume 11, Issue 12.
Paper ID: 178231 | Read Publication

Certifications

- OpenAI Academy Design and Build Agentic Systems Oct 2026
- Claude Academy Security Building with the Claude API Oct 2026
- BCG Data Science Sep 2026
- Google Generative AI Essentials Aug 2025

Languages

English: Professional Proficiency
French: B1 Level
