Keerthanaa BOLLIPALLI

Junior Data Scientist

keerthanaabnaidu@gmail.com +33 0749059131 github.com/keerthanaab2607 keerthanaa-bollipalli Bd Davout, Paris 75020

TECHNICAL SKILLS

Programming: Python, R
Databases: SQL
Data Analysis: Pandas, NumPy, Microsoft Excel
Machine Learning: Scikit-learn, classification algorithms, model evaluation metrics
Natural Language Processing (NLP): Text preprocessing, foundational text analysis
Large Language Models (LLMs): Prompt engineering, bias evaluation, model performance assessment
Tools & Environments: Git, Jupyter Notebook

EDUCATION

MSc in Data Science andAI
Data ScienceTech Institute
Oct 2025 – Aug 2027 ★Paris, France

B.E. in Computer Science
SirM.VisvesvarayaInstituteof Technology
Nov 2021 – May 2025 ★Bangalore

CERTIFICATIONS

• AWS Certified Cloud Practitioner (In progress)
• SAS Certified Data Scientist (Expected April 2025)
• Microsoft Azure Fundamentals (Expected 2027)

SOFT SKILLS

Teamwork	Time Management
Communication	Leadership
Analytical Thinking	

LANGUAGES

• English — Professional Proficiency
• French — A1 (Learning)

PROFESSIONAL OBJECTIVE

Currently pursuing a Master's degree in Data Science & AI at DSTI, I am seeking a 6-month internship commencing in April 2026. With a strong academic foundation in machine learning, problem-solving, data analysis and AI-driven solutions. I am highly motivated to contribute to impactful, data-driven projects while further enhancing my practical skills and delivering meaningful value to the organization.

PROFESSIONAL EXPERIENCE

Artificial Intelligence & Machine Learning Intern
Rooman Technologies | Bangalore
Sep 2024 – Jan 2025

• Processed and analyzed datasets using Python and SQL for machine learning workflows.built data pipelines for preprocessing and model training
• Applied feature engineering and improved model performance through iterative testing. worked with structured and semi-structured data for analysis and modeling

Front-End Web Development Intern
Varcon Technologies | Bangalore
Oct 2023 – Dec 2023

- Developed an interactive resume template using HTML, CSS, and JavaScript to improve UI structure and usability.
- Implemented responsive layouts and optimized page performance for smooth userexperience.

ACADEMIC PROJECTS

Cyber Attack Detection –Machine Learning(Python) – Nov 2025 – Mar 2026

- Built an end-to-end Machine Learning pipeline to classify cyber attacks (DDoS, Malware, Intrusion) using a 40,000-record network traffic dataset.
- Performed Exploratory Data Analysis (EDA), feature engineering, and preprocessing on structured and semi-structured cybersecurity data.
- Implemented Random Forest, Gradient Boosting, and XGBoost models with hyperparameter tuning (GridSearchCV, cross-validation).
- Utilized One-Hot Encoding, TF-IDF vectorization, PCA/FAMD dimensionality reduction, and feature selection to improve model robustness.
- Engaged Streamlit to design and deploy a web-based application for model evaluation, data visualization, and real-time attack type prediction.

Fake Account Predictor – ML & NLP – Jan 2025 – Mar 2025

- Built a system using ML (SVM, Neural Networks) and NLP to detect and classify fake social media accounts with high accuracy.
- Performed text preprocessing, tokenization, and TF-IDF feature extraction on user bio and post data to enhance model input quality.
- Evaluated models using Precision, Recall, F1-score, and ROC-AUC; applied cross-validation and hyperparameter tuning for optimization.
- Deployed the application using Django, providing a user-friendly interface for real-time account authenticity prediction.
